Summary

Data Analyst experienced in **SQL, Python, Excel, and Power BI** for data extraction, analysis, and dashboard development. Skilled in transforming complex datasets into actionable insights supporting **risk monitoring, performance reporting, and data-driven decision-making**.

Skills

Programming & Querying: Python, SQL, Base SAS, Pandas

Visualization: Power BI, Tableau, Advanced Excel

Analytics: SAS Enterprise Miner, EDA, Data Cleaning, Predictive Modeling, Risk Analytics

Work Experience

Risk Analyst

December 2022 – January 2026

Bengaluru, India

- Developed and maintained **Power BI dashboards** to track portfolio performance, authorization approvals, and delinquency trends, enabling leadership to monitor key risk KPIs.
- Wrote optimized **SQL queries** to extract and analyze large-scale credit card transaction data, improving reporting efficiency and supporting risk monitoring.
- Built automated **Excel dashboards** using Pivot Tables, Power Query, and advanced formulas to streamline monthly reporting for collections, annual fees, and payment trends.
- Designed predictive **risk models using SAS Enterprise Miner** to identify accounts with high probability of delinquency, improving early risk detection.
- Performed deep-dive analysis using **SQL, Excel, and Python** to evaluate portfolio behavior and recommend data-driven risk strategies.
- Produced **MIS reports and Power BI dashboards** for weekly business reviews, enabling leadership to make informed operational decisions.

Market Research Executive

April 2019 – December 2021

Bengaluru, India

- Conducted research on **emerging technologies and market trends** to support industry reports and market intelligence initiatives.
- Used **Excel** to organize and analyze market research data for technology companies and industry segments.
- Performed **competitor and market analysis** to identify key trends, startups, and technology developments.
- Utilized **LinkedIn and online research tools** to identify potential prospects and generate qualified leads.
- Built structured **lead generation databases in Excel** to support marketing and business development teams.

Projects

Power BI Credit Risk Dashboard

- Built an interactive **Power BI dashboard** to monitor credit card portfolio KPIs including delinquency rate, approval trends, and transaction behavior.
- Used **SQL and Excel** to extract, clean, and transform raw portfolio data for dashboard visualization.
- Implemented dynamic filters and visualizations to analyze customer segments, portfolio performance, and risk exposure.
- Enabled stakeholders to track **monthly risk metrics and portfolio trends** through automated dashboard reporting.

SQL Customer Transaction Analysis

- Analyzed large-scale transaction datasets using **SQL** to identify customer spending patterns and behavioral trends.
- Wrote complex queries using **joins, aggregations, and window functions** to calculate revenue metrics and customer activity.
- Performed exploratory data analysis using **Python and Excel** to identify high-value customers and unusual transaction patterns.
- Generated insights to support **customer segmentation, risk monitoring, and business strategy decisions**.

Education

Bachelor of Technology – Electrical Engineering

ABIT, Cuttack

2017
